Work Experience

Web Developer, Futuready media

Dec 2022 - Present

At Futuready Media, I specialize in creating responsive, engaging, and visually appealing websites that deliver exceptional user experiences. My role involves designing and developing web solutions tailored to client needs, ensuring they are optimized for performance and accessibility across all devices.

A significant achievement in this role is solely managing the setup of a Virtual Private Server (VPS) and deploying a React.js application on it. This process included configuring the server environment, ensuring smooth deployment, and maintaining high-performance standards.

Through my work, I focus on combining creativity and functionality to produce high-quality digital solutions that align with business goals and enhance user satisfaction.

Associate Software Engineer Inter - Vistaar Digital Communications Pvt. Ltd.

Feb 2022 - May 2022 (Internship)

Education

Bachelor of Computer Applications (BCA)

Amity University Online (Distance Learning)

July 2024 - Present

Currently pursuing a Bachelor of Computer Applications through distance learning, focusing on building a strong foundation in programming, software development, and web technologies. This program complements my professional experience by enhancing my technical skills and understanding of modern development practices.
